

Cloud Based Access Control System

"The Cloud" Secure offsite datacentre

ADVANTAGES OF CLOUD BASED AND FULLY MANAGED ACCESS CONTROL SYSTEMS:

- Extremely user friendly
- Cost effective
- Secure offsite storage of data
- No need for bulky expensive high maintenance servers and client workstations onsite
- Daily email reports of access events and active system users
- 24 hour support and diagnostics of faults from Metro Security Office
- Control, Manage and View your system or multiple systems via the user portal from a web browser anywhere in the world
- Free firmware and feature updates
- No expensive software maintenance agreements

DISADVANTAGES OF TRADITIONAL ACCESS CONTROL SYSTEM:

- Not very user friendly
- Bulky expensive high maintenance servers and client workstations required at each site onsite
- Primitive reporting
- Costly service and maintenance
- No offsite backups of data
- No Remote diagnostics
- Unable to Control, Manage and View your sites remotely
- Costly software updates
